Programme: Bachelor of Science (Third Year)

Subject: BOTANY

Paper Code: BOD -102

Paper Title: Research Methodology, Bioinformatics and Biostatistics

Unit: 6

Module Name: Sampling Methods

Name of the Presenter: Roxiette Heromina Siqueira

MCQS

1) Probability Sampling Methods include

   a) Quota Sampling & Random Sampling
   b) Random Sampling and Judgemental Sampling
   c) Cluster sampling and convenience sampling
   d) Cluster sampling and random sampling

2) Sample is

a) A representation of the whole population

b) A representation of the a part of population

c) A representation of a community

d) None of the above

Short Notes:

   1) Write in brief about probability sampling?
   2) What is the importance of sampling?
   3) How is probability sampling different from non-probability sampling
