## **Quadrant II – Transcript and Related Materials**

**Programme:** Bachelor of Science (Second Year)

**Subject**: Zoology

Course Code: ZOC 104

Course Title: Animal Physiology and Biochemistry

**Unit:** Unit 10 - Enzymes

**Module Name :** Enzymes : Nomenclature and Classification

Name of the Presenter: Mrs. Vishwal B. Sinai Kunkolienkar

## Glossary of terms/words:

- Oxidation Loss of electrons during a chemical reaction from one atom to another.
- **2. Reduction** Gain of electrons during a chemical reaction from one atom to another.
- **3. Ligation** Reaction involving formation of bond using energy from ATP.
- **4. Group transfer** Transfer of functional group from one atom to another in a molecule or from one molecule to another.
- **5. Hydrolysis** Cleavage of covalent bond, such as peptide bond, by addition of elements of water, yielding two or more products.
- **6. Functional Group** Specific atom or group of atoms that confer a particular chemical property on a biomolecule.
