

Hello students, welcome to this module. This module is for the program Bachelor of Education/B.Sc.B.Ed./B.A.B.Ed. Subject Education.

Paper code EDU01 and BSBA EDU01. First year and semester 5. paper title Foundations of Education. Unit number Unit 1 the social, cultural, and political context of education.

Module number 9 and module name is emerging trends in societies and their globalization of education. My name is Mr Khushali U.Prabhu,assistant professor in education

from HPSM's Ganpat Parsekar College of Education, Harmal, Goa. In this module we are going to cover the following topics. Definition of globalization, impact of globalization on education.

Advantages of globalization,Disadvantages of globalization and at the end role of a teacher in globalization.

After Learning this model, students will be able to explain the meaning of globalization of

education, illustrate the impact of globalization on education,

describe the advantages and disadvantages of globalization,

and use the concept of globalization to formulate

teachers role in globalization of education.

Let's begin with the introduction the phenomenon

of globalization is considered as the most widespread trend of

the century ever witnessed in our country, and in fact, worldwide.

It has resulted from the worldwide integration of

economic and financial sectors. In India, over centuries we

believed in the concept of Vassudev Kutuumbakam. This

means that entire world is our family. We notice the relevance of this concept in globalization

as well. Let's see the definition of globalization.

A set of processes by which the world is rapidly being integrated into one economic space via increased international trade the Internationalization of production and financial markets, the internationalization of a commodity culture, promoted by increasingly networked global telecommunication system. globalization also refers to increasing flow of technology,finance, trade, knowledge, values, ideas and people across the borders. Now let's link the globalization concept with education in a topic.

Globalization of education,point number one education systems have not escaped the forces of globalization education systems around the world have been.

Influenced by the global policies as developed by the international institutions such as UNESCO, UNICEF and the World Bank.

Point #2, the Technological revolution, which is the part and parcel of globalization, in particular in the use of NIITs, has already a most visible impact on the education sector

worldwide. A global education market of recent origin.

point #3 the emergence and fast spread of shared and desired aim for educational policy makers. When I say globalization of education,it means that we have to take

knowledge as a commodity in simple words, what we can do

because of globalization is our Indian schools can build a

campus in foreign countries, not only that our Indian universities can also build their campuses in foreign countries the same way.

Foreign schools as well as foreign universities can build

their campuses in India as well.

Now let's see impact of globalization on education. The Impact of globalization on education and the manner in which the system should respond

to the needs of globalization would require to be studied

basically under the following points.

The needed reforms within the educational system like content, equity and excellence.

Content of education. The fast developing stock of knowledge and the need for its continuous updating is felt. No longer is education confined to a particular period

of life.

Equity and excellence. An important component of

globalization in relation to education is the need for

producing quality manpower that can successfully face the

competition in the world.

Teacher education. The purpose of teacher. Education is to produce teachers who have

professional competencies, the role of teachers is no longer

confined to teaching alone. They Need to be thorough,

professional, fully equipped with high academic standard,

pedagogical and practical skills.

Now let's see the advantages of globalization,  
first point globalization of education improves quality in

education. Because when we say that when we allow foreign universities or schools to open their  
campuses in India they will bring the better pedagogy. They

will bring the better technology and that enhance the quality of education.  
point #2 globalization help us to gain or reach to new

knowledge faster.

point #3. It promotes world culture and universal brotherhood through Interaction.

Point, #4 partnership and networking among the countries in an educational

field improves the quality of teaching and research.

point #5. It is helpful in developing international understanding and

perspective through the medium of higher education.

Example there are students exchange program, teacher exchange

program or researcher exchange program between Indian and

foreign universities.

Point #6 It is helpful in evolving and using new strategies and techniques of instructions and

generating new discipline.

Example globalization promotes inclusive education where teachers will know methods and

techniques to teach special children's and this is possible only because of globalization.

Point #7. Through globalization we get world level knowledge of science, technology and

experiences of highly qualified professionals.

Point #8 Teacher or student can share course materials, ideas between the institutions across national

boundaries.

Point #9 promotes Indian culture abroad.

Point #10 Promotes international understanding between countries.

Now let's see disadvantages of Globalization.

point number one foreign education is far more expensive.

point #2 educational institutions are involved in the process of nation building

through creation of knowledge and service to the community. The

presence of foreign institutions will convert education from a

social service and a public good into a private service and

private commodity.

Point #3 the course contain would be decided by market needs rather than national requirements.

point. #4 Entry of unreliable foreign education providers.

Point #5 Unethical accounting practices to earn money.

Point #6 commercialization of higher education.

now let's see role of a teacher in globalization.

Point number one teacher should be very conscious and aware in

today's age. Focus on continuous upgrading of skills.

point #2 should have wide knowledge and analyse by studying and being

dedicated towards his duty.

point#3. She or he should have faith in change and have an integrated point of view.

Point. #4 should have faith in modernization and be cooperative in the exchange of different cultures.

Point #5 should have a liberal attitude.

Point #6 should have interest in new techniques of teaching while

teaching a particular subject.

Point. #7 should not remain confined only to the theoretical aspects, but should be an expert

in adopting the new techniques of experimentation, observation,

and supervision.

Point #8 Should be capable of developing the spirit of world citizenship

among the students.

Ppoint #9 Teacher should be able to collaborate the different tasks for students. She or he should

be able to collaborate best Technology in teaching learning process.

Point, #10 Teacher should be an exemplary role

model of how a lifelong learner should be.

Point #11 Teacher must be imagine. Should be able to see the potential of the

emerging technologies, make links that enhance and value learning.

point number 12, this is a good way to

teach others about what is special to you and to learn

about other people at the same time.

Point. #13 Teacher should make their learning style adapt to change their

student. These are the references for this model.

Thank you.
